

European University Institute
Background Course on Mathematics
Fall 2015

Instructor: antonio villanacci, E-mail: antonio.villanacci@unifi.it
Office Hours: After the first two classes of the week (one hour after the end of the class)
Teaching Assistant: ...
Teaching Assistant Office Hours: ...

Prerequisites.

Students are supposed to be familiar with the topics usually taught in basic course on Calculus and Linear Algebra. Those topics are covered in either of the following sets of books and notes:

1.

Apostol, T. M., (1967), *Calculus, Volume 1*, 2nd edition, John Wiley & Sons, New York, NY: Chapters 1-7 included, 9-10.

Clark, C., (1982), *Elementary Mathematical Analysis*, 2nd edition, Wadsworth Publisher of Canada, Ltd., Belmont, CA. Appendix 1.

Villanacci, A., (2014), Basic Mathematics for Economics, available on line: Chapters 1, 2 and 3; Sections 5.1 and 5.2

2.

Spivak, M., (1980), *Calculus*, 2nd ed., Publish or Perish, Inc., Houston, TX: all but chapters 16, 20, from 23 to 29, included.

Clark, C., (1982), *Elementary Mathematical Analysis*, 2nd edition, Wadsworth Publisher of Canada, Ltd., Belmont, CA. Appendix 1 and Appendix 2.

Villanacci, A., (2014), Basic Mathematics for Economics, Chapters 1, 2 and 3; Sections 5.1 and 5.2.

Content of the course

Linear algebra. Some topology in metric spaces. Differential calculus in Euclidean spaces. Nonlinear programming.

Reading material

Mandatory. Villanacci, A., (2014), Basic Mathematics for Economics, available on line at the webpage:
to be added

→→ Students are supposed to have read and understood the content of Chapters 1, 2 and 3 and Sections 5.1, 5.2 before the beginning of the course. ←←←

Main sources of the Notes.

I. Linear algebra

Lang S. (1971), *Linear Algebra*, second edition, Addison Wesley, Reading.

Lipschutz, S., (1991), *Linear Algebra*, 2nd edition, McGraw-Hill, New York, NY.

II Some topology in metric spaces.

Lipschutz, S., (1965), *General Topology*, McGraw-Hill, New York, NY.

McLean, R., (1985), Class notes for the course of Mathematical Economics (708), University of Pennsylvania, Philadelphia, PA, mimeo.

Ok. E. A., (2007), *Real Analysis with Economic Applications*, Princeton University Press, Princeton NJ.

Simmons, G. F., (1963), *Introduction to Topology and Modern Analysis*, McGraw-Hill, New York.

III Differential calculus in Euclidean spaces

Apostol, T. M., (1974), *Mathematical Analysis*, 2nd edition, Addison-Wesley Publishing Company, Reading, MA.

IV Nonlinear programming.

Cass D., (1991), *Nonlinear Programming for Economists*, University of Pennsylvania, Class Notes.

Teaching and Review Sessions

The course is organized on 12 lectures and 5 review sessions. Review sessions will be devoted to the discussion and solutions of exercises. Class time will be organized as follows: 1 hour and 15 minutes class; 15 minutes break; 1 hour class.

Exam Requirements

There will be a final exam and 3 homework assignments. The final grade will be based on the final exam (90 per cent of the final grade) and on the problem sets (10 per cent of the final grade).

The final exam will be open notes-open books.
