

The *Oxford Research Encyclopedia of Economics and Finance* now features full text articles including "Experimental Economics and Experimental Sociology" by Johanna Gereke and Klarita Gërxhani. **Image:** Public Domain via Unsplash.

NEW AND FEATURED

Creative Destruction, Technology Disruption, and Growth

"The origins of modern technological change provide the context necessary to understand present-day technological transformation, to investigate the impact of the new digital technologies, and to examine the phenomenon of digital disruption of established industries and occupations. How these contemporary technologies will transform industries and institutions, or serve to create new industries and institutions, will unfold in time..." – By Thomas Clarke

Behavioral and Social Corporate Finance

"Over the past two decades, there has been a rapidly growing interest in augmenting standard finance frameworks with novel insights from cognitive psychology, and more recently, social psychology and sociology. This emerging subfield in finance research has been dubbed behavioral corporate finance, which differentiates between rational and behavioral agents and principals..." – By Henrik Cronqvist and Désirée-Jessica Pély
