

## **Workshop: Mixed methods**

**3rd Term, Academic Year 2022-2023**

**Dates: 20-21 March 2023**

**Instructors: Daniëlle Flonk (Max Weber Fellow and SPS Part time professor) & Effrosyni Charitopoulou (Max Weber Fellow)**

The workshop teaches researchers about research design/implementation and focuses on how to combine different methods, i.e., using qualitative and quantitative approaches in an effective and complementary way. What kind of method is best suited to the research question? Should we employ a parallel or sequential design? How to analyse data and integrate findings in a coherent way?
