Max Weber Programme-Academic Careers Observatory, EUI

Horizon 2020
European Union funding
for Research & Innovation

Research Funding Opportunities, 28 January 2020

What is ERC?

European Research Council

Established by the European Commission

The ERC supports excellence in frontier research through a bottom-up, individual-based, pan-European competition

Budget: € 13 billion (2014-2020) - 1.9 billion €/year
€ 7.5 billion (2007-2013) - 1.1 billion €/year

Legislation

- Scientific governance: independent Scientific Council with 22 members including the ERC President; full authority over funding strategy
- Support by the ERC Executive Agency (autonomous)
- Excellence as the only criterion

Strategy

- Support for the individual scientist – no networks!
- Global peer-review
- No predetermined subjects (bottom-up)
- Support of frontier research in all fields of science and humanities

ERC H2020 Budget

**ERC Budget
€ 13 billion**

For 2020, the budget is more than 2.25 billion euros, the highest ever since the beginning of the ERC.

Scientific Governance by the Scientific Council

ERC Basics

European Research Council

Established by the European Commission

European Research Council

Established by the European Commission

INDIVIDUAL RESEARCHERS
FROM ALL OVER THE WORLD

LONG TERM
GRANTS

TO HIGH-RISK/HIGH-GAIN PIONEERING PROJECTS
IN ANY FIELD OF FRONTIER RESEARCH

Life Sciences

Physical Sciences and Engineering

Social Sciences and Humanities

Creative Freedom to Individual Grantee

European Research Council

Established by the European Commission

ERC offers independence, recognition & visibility

- to work on a research topic of **own choice**, with a team of **own choice**
- to gain true **financial autonomy** for 5 years
- to negotiate with the host institution the **best conditions** of work
- to attract **top team members** (EU and non-EU) **and collaborators**
- to move with the grant to any place in Europe if necessary (**portability of grants**)
- **to attract additional funding and gain recognition**; ERC is a quality label

Funding Structure

ERC Grant schemes

European Research Council

Established by the European Commission

Starting (StG)
2-7 years after PhD

*up to € 1.5m (+1m)
for up to 5 years*

Consolidator (CoG)
7-12 years after PhD

*up to € 2m (+1m)
for up to 5 years*

Advanced (AdG)
significant research
achievements (last 10y)

*up to € 2.5m (+1m)
for up to 5 years*

Proof-of-Concept

to bridge the gap between research
& the earliest stage of
marketable innovation

*Lump sum €150,000 for ERC grant
holders*

Synergy

to address ambitious research problems jointly,
enabling transformative research

*2 – 4 Principal Investigators
up to € 10m (+4m) for up to 6 years*

***NEW from 2019** – 1 PI can be based outside EU/AC*

Reasons for Additional budget

„Additional funding up to the amounts set out in the table below can be requested in the proposal to cover the following eligible costs when these are necessary to carry out the proposed work:

- (a) "start-up" costs for Principal Investigators moving to the EU or an Associated Country from elsewhere as a consequence of receiving the ERC grant and/or*
- (b) the purchase of major equipment and/or*
- (c) access to large facilities and/or*
- (d) other **major experimental and field work costs**, excluding personnel costs.” (WP2020, page 22)*

Evaluation Panel Structure (WP2020)

Covering all areas of science – descriptors are not priorities

Each panel: Panel Chair and 12-16 panel members

European Research Council

Established by the European Commission

Life Sciences

- LS1 Molecular Biology, Biochemistry, Structural Biology and Molecular Biophysics
- LS2 Genetics, 'Omics', Bioinformatics and Systems Biology
- LS3 Cellular and Developmental Biology
- LS4 Physiology, Pathophysiology and Endocrinology
- LS5 Neurosciences and Neural Disorders
- LS6 Immunity and Infection
- LS7 Applied Medical Technologies, Diagnostics, Therapies and Public Health
- LS8 Ecology, Evolution and Environmental Biology
- LS9 Applied Life Sciences, Biotechnology and Molecular and Biosystems Engineering

WP 2021: Contours of panels redefined, descriptors enriched (especially LS), two new panels (PE11, SH7)

Physical Sciences & Engineering

- PE1 Mathematics
- PE2 Fundamental Constituents of Matter
- PE3 Condensed Matter Physics
- PE4 Physical and Analytical Chemical Sciences
- PE5 Synthetic Chemistry and Materials
- PE6 Computer Science and Informatics
- PE7 Systems and Communication Engineering
- PE8 Products and Process Engineering
- PE9 Universe Sciences
- PE10 Earth System Science

Social Sciences and Humanities

- SH1 Individuals, Markets and Organisations
- SH2 Institutions, Values, Environment and Space
- SH3 The Social World, Diversity, Population
- SH4 The Human Mind and Its Complexity
- SH5 Cultures and Cultural Production
- SH6 The Study of the Human Past

What is the ERC looking for?

Frontier of science, scholarship and engineering, i.e.

✓ Multi- or interdisciplinary proposals which cross boundaries between different fields of research,

or

✓ Pioneering proposals addressing new and emerging fields of research,

or

✓ Proposals introducing unconventional, innovative approaches and scientific inventions.

Evaluation of proposals

Excellence is the sole evaluation criterion

European Research Council

Established by the European Commission

- **Excellence of the Research Proposal**

- ✓ Ground breaking nature
- ✓ Ambition
- ✓ Feasibility
- ✓ *Synergy Grants*: goes beyond what PIs could do alone?
Combination of scientific elements crucial to address scope and complexity of problem?

- **Excellence of the Principal Investigator**

- ✓ Intellectual capacity
- ✓ Creativity
- ✓ *Synergy Grants*: Group brings together necessary elements?

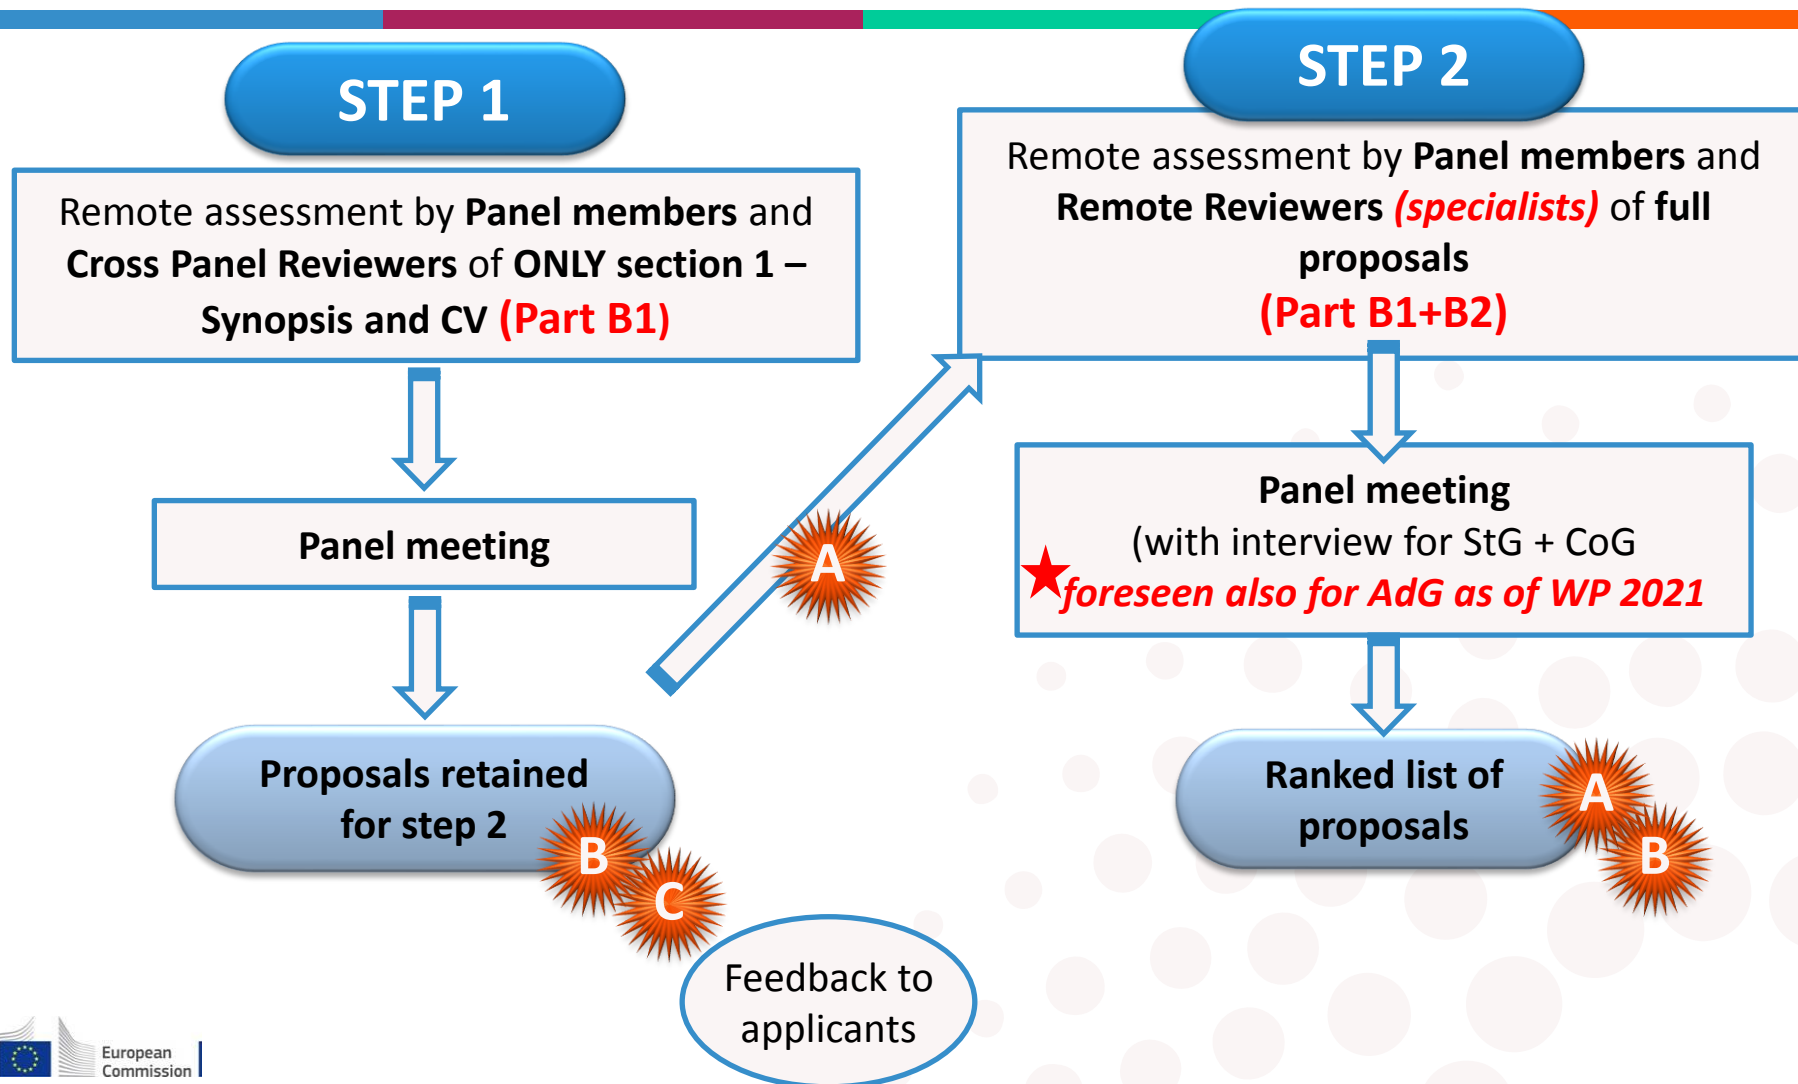

Evaluation process

(StG, CoG, AdG)

European Research Council

Established by the European Commission

Preparing your proposal:

Part B1 – 5 pages + CV and track record

European Research Council

Established by the European Commission

- Project: **innovative**? new aspects/solutions/theories?
- Current **state of play**? Know your competitors.
- **Beyond the state of the art** VS incremental?
- Highlight the **high-risk & high-gain** character!
- Goals **realistic**? Risk mitigation?
- Concise and clear: **also for generalists**!
- **Coherence** of proposed project?
- **Feasibility** (scientific approach)

Preparing your proposal:

Part B2 15 pages + CV and track record

European Research Council

Established by the European Commission

- Do **not repeat** the synopsis
- Extensive **methodology** and **work plan**
- Go into more detail with the **state of the art**
- Provide **strategies** to mitigate risks
- Explain **involvement** of team members
- **Justify** requested **resources**
- Ask funding for **Open Access** (mandatory)

Preparing your proposal: Choosing your panel

European Research Council

Established by the European Commission

Descriptors are not exhaustive, not a classification

Any topic/field is equally welcome, whether mentioned in panel structure or not

Descriptors and free keywords used by panel chair to assign reviewers – choose carefully

If crosspanel proposal: reviewers from both panels used. Explain why proposal is crosspanel (part B1)

In a nutshell (1/2)

European Research Council

Established by the European Commission

- Be ambitious and "daring", think big; panels are instructed to seek out high-risk/high gain research
- Grab interest and attention of reviewers
- Remember: Part B1 seen by "generalists" (panel members)
- If you make it to Step 2, reviewers (incl. "specialists" - external) see **both** B1 and B2 - do not repeat B1 in B2
- Do not include unnecessary partners and collaborators; it is not supposed to be a "consortium"
- Get agreement from collaborators to be named in proposal

In a nutshell (2/2)

European Research Council

Established by the European Commission

- For interviews:
 - ➔ Get panel members interested in you and what you are doing
 - ➔ Practice thoroughly; typically a 5-10 minute presentation + 20-25 minutes of questions
 - ➔ Panels want to see that these are *your* ideas, not those of your supervisor
 - ➔ It is normal to be nervous...

Contrary to what you may think.....

- ✓ ERC funds "frontier research", including applied research.
- ✓ The budget is distributed among the scientific panels as a function of demand.
- ✓ The panel descriptors do not represent ERC scientific priorities.
- ✓ The success rate is virtually flat across the eligibility window (StG, CoG).
- ✓ Publication record is not decisive in selection decisions.
- ✓ The Host Institution is not an evaluation criterion.

Key points...

European Research Council

Established by the European Commission

- Proposals shorter than five years/below max. budget are equally welcome. The project needs determine the budget.
- Quality/potential of applicant is evaluated in view of concrete career stage and local conditions (access to facilities etc.).
- Already having an ERC grant does not guarantee obtaining another one; each proposal is evaluated on its own merit.
- Resubmissions have a significantly higher success rate. Feedback from panels is valuable to advance own research
- Look at funded projects in your area (search tool on ERC website), testimonials, tutorials, previous panel composition

What is an ERC PoC?

- Support for initial steps to turn research outputs into a commercial or socially valuable proposition
- A 150.000€ /18 months grant with the objective to verify the innovation potential of an idea
- Only ERC grantees are eligible to apply

Evaluation PoC criteria

1. Excellence in innovation potential

- Analysis whether expected outcomes are innovative or distinctive as compared to existing solutions

2. Impact

- Ability to generate benefits to economy, society, culture, public policy, services

3. Quality & efficiency of implementation

- Sound project management plan; demonstrate qualification of persons; appropriate resources
