

# TRANSFORMING GOVERNANCE BEYOND BORDERS

## Mission Statement

### Who we are

The School of Transnational Governance was established in 2017 as part of the European University Institute in Florence. In the cradle of the Renaissance we train, educate and inspire the current and next generation of global leaders through our Master's Programme, Executive Education, Fellowships and High Level Policy Dialogues. At our School, theory meets practice across disciplines, generations and geographies. Our base is European, but our reach is global. For us, governance goes beyond the state and beyond the public-private divide.

We teach, train and learn by providing a platform where transnational policy actors across politics, business, civil society, media and academia meet. We are here for anyone with an open and independent mind, for thinkers and for doers. We bring together some of the best teachers, trainers and policy-makers from around the world. We believe the goal of public policy is to bring out the best in people.

### Mission

Our mission is to teach and train current and future leaders.

We are a platform for transnational policy shapers.  
We are a hub for innovation in public policy education and training.  
We are a laboratory and a forum for policy experimentation.

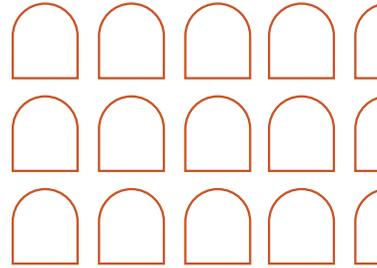

## Values

Our roots are European, our values are universal.

We believe in freedom, democracy and inclusiveness.

We believe in dignity, dialogue and respect.

We believe in diversity, equality and sustainability.

## Purpose

Our purpose is to help improve governance around the world.

This matters because problems transcend national borders.

It matters because governance frameworks are often unfit for purpose.

It matters because in a complex world facts and values should be the deciding voice.

## Vision

Our vision is to be the global hub for teaching and training in transnational governance.

We aspire to be the global go-to policy school.

The place to change perceptions of governance.

The cutting edge school of policy learning and practice.

## Approach

We bring together theory and practice.

Our approach is transnational and interdisciplinary.

Our approach is rooted in social sciences and policy practice.

Our approach is to think, teach and train beyond borders.

**Join our quest to transform  
governance beyond borders.**
