What people say

I enjoyed the diversity of topics, speakers and participants, the level of presentation and influx of information, challenging our mindset and knowledge.

The combination of policy level work, presentations, academic work and case studies captured the best of the programme and provided a tremendous value to learning from different sectors and approaches

Great social interaction and very good organisation in terms of accommodation, classroom, location, catering, etc.

My experience has been extremely valuable, not only in terms of the content raised by the speakers but also because of the personal experiences brought by the colleagues.
